Open Source Hypervision

Jeudi 12 mars 2026

Bienvenue au 1^{er} Canop'Tour !

Sommaire

- ▶ Présentation et tour de table
 - ▶ Actualité business
 - ▶ Retex mise en place
 - ▶ Roadmap 2026 - 2028
 - ▶ Table ronde
 - ▶ Retex bilan d'utilisation
- 

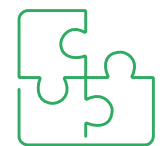

Actualité business

En bref...

3 nouveaux clients en 2025

- ▶ ICDC
- ▶ DSIA
- ▶ Leviia

4 POC en cours

Essor du 24 / 7

- ▶ 5 clients déjà conquis
- ▶ D'autres contrats en discussion

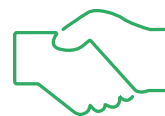

1ère formation partenaires réalisée

- ▶ Initiation fonctionnelle à Canopsis
- ▶ Découverte du partenariat commercial

3 formations certifiantes en développement

- ▶ Disponibles au 1er trimestre 2026
- ▶ 2 niveaux : Administrateur et Expert

Présent au catalogue UGAP

Responsable technique dédié	✓	✓

Actualité business

Pourquoi choisir l'offre 24/7 ?

- ▶ Continuité de service et réactivité indispensables aux SI critiques
- ▶ Accès direct à des ingénieurs experts pour gérer les situations critiques en HNO
- ▶ Réduction du temps d'indisponibilité et protection de vos SLA
- ▶ Sérénité des équipes internes grâce à un relais d'expertise permanent

Roadmap Canopsis

2026 - 2028

Canopsis 25.10

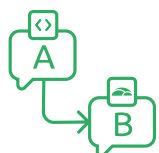

Nouveautés fonctionnelles

Studio templates

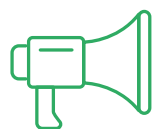

Jetons d'authentification externe

Alias

Notifications - Filtres d'événements et de la remédiation

Diffusion de messages

Connecteur Grafana

Canopsis 25.10

Évolutions fonctionnelles

Enrichissement - Données externes et traçabilité

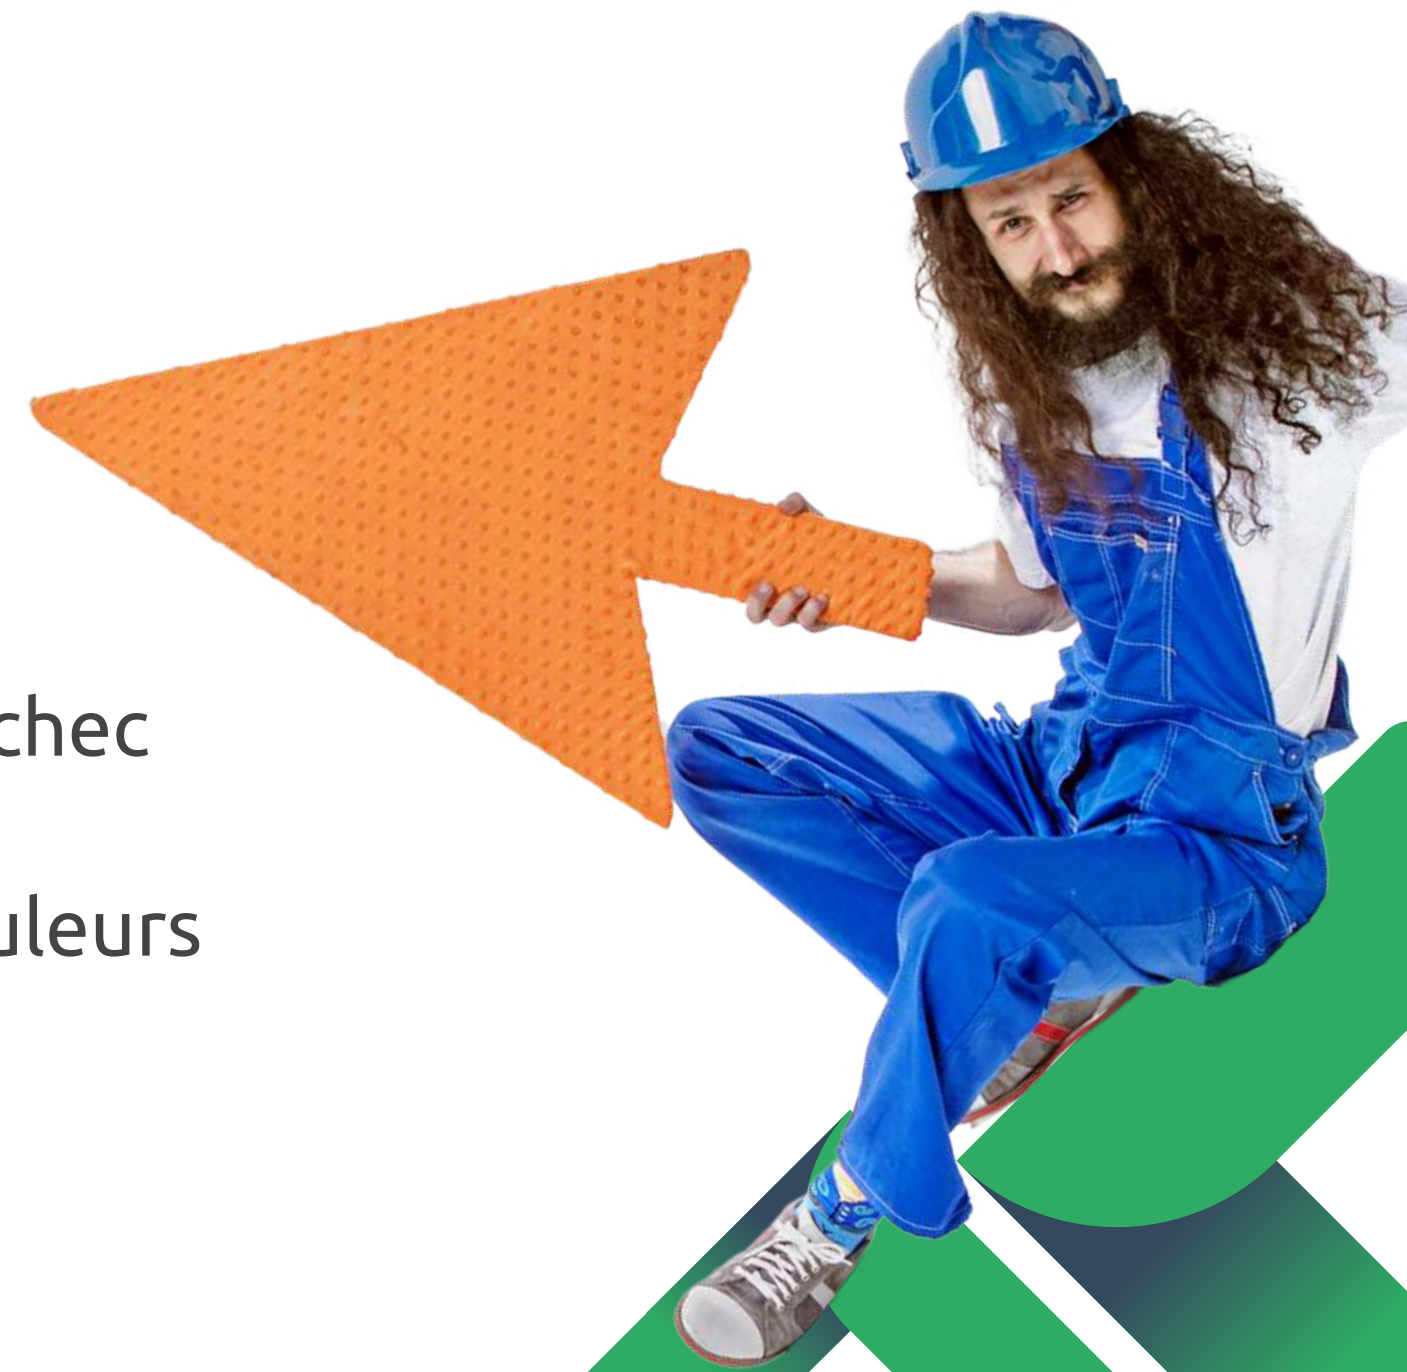

Bac à alarmes - Recherche avancée et filtrage rapide

Remédiation - Politique de retry des remédiations en échec

Thèmes graphiques - Refonte complète des jeux de couleurs

Canopsis 26.04

Gestionnaire de jobs

The screenshot displays the Canopsis Jobs management interface. At the top, there is a navigation bar with 'Canopsis' and 'OK' buttons, and a menu with 'EXPLOITATION', 'ADMINISTRATION', 'NOTIFICATIONS', and 'ROOT'. Below this, the 'Jobs' section is active, with sub-tabs for 'INSTRUCTIONS', 'WEBHOOKS', 'TICKET STATUS', and 'AUTH TOKEN'. A search bar and filter options are present. The main content area shows a table of jobs with columns for 'Ticket system name', 'Ticket number', 'Active', 'Last status', 'Last run start date', 'Last run finish date', 'Next run date (approx.)', 'Last run fail reason', and 'Actions'. A detailed view of a failed webhook is shown below the table, displaying the request and response details.

Ticket system name	Ticket number	Active	Last status	Last run start date	Last run finish date	Next run date (approx.)	Last run fail reason	Actions
Jira	3247	+	✗	22/07/2021 0:00:00	22/07/2021 0:00:00	22/07/2021 0:00:00	Some fail reason	✎ ↻
Jira	3247	+	✓	22/07/2021 0:00:00	22/07/2021 0:00:00	22/07/2021 0:00:00	-	✎ ↻
Jira	3247		✗	22/07/2021 0:00:00	22/07/2021 0:00:00	-	Some fail reason	✎ ▶

Webhook is failed : request url https://www.jira.com failed with status code 400

Request : POST /api/v4/pbehaviors HTTP/1.1

Response : HTTP/1.1 400 Bad Request

Gemini

+ CREATE PATTERN

EDIT PATTERN

OPTIMIZE PATTERN

VALIDATE PATTERN

AI pattern assistant →

✓ Corrected pattern

```
"alarm_pattern": [
  [
    {
      "field": "v.component",
      "cond": {
        "type": "eq",
        "value": "test-attribute-correlation-1"
      }
    }
  ]
]
```

Notes:

- Structurally valid JSON.
- Semantically valid for an alarm pattern where:
 - Inner array = AND conditions
 - Outer array = OR groups
- This pattern matches events where v.component equals "test-attribute-correlation-1".

What to do with the corrected pattern?

The background features abstract geometric shapes in shades of green and dark blue. A large, light green shape is on the right, with a dark blue shape overlapping it. A white diagonal line runs across the scene, separating the dark blue and light green areas. The text is positioned on the left side of the image.
